- **My skills and expertise:** Javascript, Typescript, React, Node.js, C#, .NET , MySQL, MongoDB PHP.

Experience

2021 - 2023 Full-Stack Developer , Signature-it

- Developed dynamic and responsive web applications using HTML, CSS(Less,Tailwind, styled component), Javascript (jquery) and **React**, contributing to enhanced user experiences and interface functionality.
- Led the implementation process to **reduce debug time** through Xdebug integration and git blame on development servers.
- Leveraged **advanced JavaScript** knowledge, including promises, event loops, and **jQuery**, to optimize frontend interactivity.
- Assisted in the deployment and management of containerized applications using K8s (**Kubernetes**)
- Collaborated as a key member of a cross-functional team to develop a responsive e-commerce platform using React and Magento framework.
- Actively contributed to **CI/CD** processes using **Bitbucket**, facilitating continuous integration and deployment.
- Utilized scripting skills to automate development team tasks using **Bash scripts**, contributing to increased efficiency and streamlined workflows.
- Contributed to **PHP** development, expanding backend capabilities and driving overall application functionality.
- Proficiently crafting end-to-end REST and SOAP **API** integrations for seamless data retrieval.
- Mitigated API access disruption through strategic adjustment, ensuring uninterrupted data retrieval by altering call approach.
- Implemented **multi-environment** (dev, stage, prod) infrastructures for Magento-based projects, streamlining development processes and deployment workflows.

Education

2021 - 2022 Full-Stack Development

- Acquired expertise in design patterns, algorithms, databases, cloud technologies, OOP principles, software fundamentals,
- Hands-on experience with modern web technologies, frameworks, and tools.
- Gained practical knowledge of version control, databases, and REST APIs.
- **Projects:**
 - Developed and deployed a real-time chat application using WebSocket using MERN stack.
 - Built an airplane simulator application with multi-threading operations.
 - Collaborated with teammates to create a Pet Shop Website using the .NET framework with MVC pattern.

Certifications

- **Microsoft Certified Azure Fundamentals**
